

Simplify fleet telematics with AT&T Fleet Complete Connected Devices

AT&T covers **more roads** than any other carrier¹

Get real-time insights on the performance and status of drivers, vehicles, heavy equipment, and other assets

Fleet managers today face a dizzying set of challenges. These include rising operational costs, the need for public safety, regulatory compliance, and near real-time visibility into people, operations, and assets.

AT&T Fleet Complete Connected Devices offers a full suite of tools that interoperate on a common platform, providing intuitive and real-time insights on the performance and status of fleet operations, drivers, trucks, vehicles, heavy equipment, and all other moveable assets.

“Our immediate ROI with AT&T Fleet Complete has been huge. In the past, we may not have even found (lost or stolen) vehicles for months, which would have cost us around \$160,000 to replace.”

Fleet Operations Manager

Connected devices features & benefits

- Full suite of tools that interoperate on a common platform
- Includes AT&T Fleet Complete Hub, one platform to manage all fleet needs
- Scalable solution across fleets of all sizes, vehicle types, and industries
- Fleet dashboards and automated reporting

FTxw hardware features & benefits

- Plug-and-play hardware installation
- In-vehicle Wi-Fi®
- Real-time GPS tracking
- Fuel tracking and reporting for improved fuel efficiency
- Harsh braking/cornering detection

¹ Based on nationwide GWS drive test data. GWS conducts paid drive tests for AT&T and uses the data in its analysis.

AT&T Fleet Complete Connected Devices

AT&T Fleet Complete Connected Devices includes hardware, such as Fleet and Asset Trackers.

The FTxw, which is now FirstNet Trusted™ and available for use on FirstNet, is the new Wi-Fi enabled hardware custom built for AT&T Fleet Complete. This hardware gives you support for up to 10 users for Wi-Fi connectivity, which means you can connect to critical applications while on the go.

FTxw is a universal plug-and-play device that plugs into the onboard diagnostics (OBDII) port, with full support for light and heavy-duty trucks, electric vehicles, and hybrids. FTxw supports LTE 4G connectivity, which enhances the speed of data flow. It also offers advanced GPS with near real-time data insights to detect safety issues, such as harsh braking, rapid acceleration, and others.

AT1 Asset Tracker is another piece of hardware in the family of AT&T Fleet Complete Connected Devices. One of the smallest and most cost-effective equipment trackers on the market, AT1 Asset Tracker provides you great competitive insight over your high-value assets in the field. Quickly find your asset's latitude and longitude to check the status of machinery, equipment, tools, toolboxes, cargo, and more, all from your mobile device.

AT&T Fleet Complete Connected Devices can be used in a variety of industries that require fleet tracking, including:

- Transportation
- Wholesale and retail trade
- Construction
- Field services
- Logistics
- Utilities and energy
- Government
- Healthcare and education
- Manufacturing
- Food and beverage
- Public safety
