- Access to AT&T product and service delivery teams

AT&T Consulting and Professional Services provides the end-to-end expertise you need to advance your multi-cloud transformation journey.

Anything worth doing is worth doing right, especially when you're connecting to multiple clouds to do business. While multi-cloud connectivity offers many benefits to help you excel in areas like speed, performance, and innovation, overcoming the complex technology and decision-making necessary to get you there is no small feat. You need a cross-functional team of experts with a proven track record in delivering fast, secure, and reliable multi-cloud connectivity.

Whether you're already connected to multiple clouds or just starting to research the benefits, AT&T Consulting and Professional Services has the tools, knowledge, and experience to speed your multi-cloud business evolution. We serve enterprises of all sizes and industries, making us uniquely qualified to find the right solution for your business needs. Our services enable secure, fast, and reliable connectivity to the cloud, within the cloud, and between clouds.

Strategies to fit your enterprise. Most enterprises have multiple clouds, and each of them works differently with different features, functions, and native network architectures. That's why even the most knowledgeable IT teams turn to our Consulting and Professional Services experts when they have questions about how to make the most of their multi-cloud networking landscape.

We provide robust solutions using a holistic approach guided by detailed methodology, best practices, and lessons learned from a wide-ranging portfolio of past projects for organizations all over the world. As your trusted multi-cloud advisor, we're here to listen and understand your thought process, business goals, and operational challenges so we can deliver the insights and transformation best aligned with your unique needs.

Solutions to fit your business scenario. Our customers come in all sizes and levels of expertise. The broad range of organizations we serve and scenarios we encounter enable us to stay on top of the latest solutions in the marketplace, so we provide you with a multi-cloud connectivity approach that keeps you on the

competitive edge. We offer a variety of services via a flexible engagement model to provide expertise where and when you need it.

For technology advice and planning, our Consulting Advisory service team works with you to develop a strategy and vision for your multi-cloud connectivity requirements. We help you make key decisions around the technologies, architectures, vendors, and platforms required to meet your use cases. We also provide the due diligence that enables you to make data-driven decisions related to the approach to secure connectivity to the application services regardless of where these applications sit.

Our professional services deliver the expertise necessary to deploy the technologies and solutions you've chosen for your multi-cloud transformation. Once it's time to execute, our professional services team members function as an extension of your organization to carry out the design, engineering, testing, deployment, and support to reach your target state. This includes migration planning, testing, transformation, and governance.

We serve nearly 2.5 million of the largest global companies, government agencies, and small businesses.

For enterprises seeking to jump-start their journey to transformation, we provide trusted advisor support to augment your teams using our "Fast Start" program. This includes technical and project management subject matter experts who integrate into your team to accelerate and de-risk your transformation efforts. Because they provide the expertise and program know-how, they will help jump-start key decisions and technical activities based on best practices, vendor selection, and multi-cloud tools and templates.

The benefit of AT&T global experience. In addition to the AT&T Business solutions we offer, the relationships and access we have to our vendor ecosystem brings unparalleled options as you evolve. Our deep-reaching catalog of intellectual property includes everything from tools and templates to de-risk and accelerate deployment, to playbooks, reference architectures, designs, plans, and dashboards. You'll also benefit from the knowledge of our AT&T product, service, and technical teams for AT&T sourced solutions.

Connectivity and security—it's in our DNA. Connectivity and security are inherent in everything we do in the cloud. From mobile and work-from-home users to job sites and connected branch offices, we'll supply you with the technology and visibility needed to secure and protect your data. As the leading transport vendor, we'll also advise you on how to safeguard your network—be it secure access service edge (SASE), software-defined wide area network (SD-WAN), or something else.
